

Mary Davis

**Senior Vice President, V3locity Product
Majesco
Greenwich, Connecticut**

Mary is senior vice president, V3locity product at Majesco, leading product strategy for group insurance benefits, U.S. public pension fund administration, multiemployer pension plan administration, and pension risk transfer. In this role, she defines the long-term vision, prioritizes roadmap initiatives based on market trends and common customer needs, and drives baseline standard solutions that satisfy customers, streamline implementations, and ensure scalable, enduring partnerships. Earlier in her career, Mary designed and configured the V3locity platform, delivered impactful sales demonstrations, and led consultative project implementations. She began her career as a key contributor to Vitech's entry into the group benefits market and helped establish its product management function, shaping standards across group voluntary benefits, defined-benefit pension plans, and institutional retirement markets. Mary holds a B.S. degree in industrial engineering from Lehigh University. She is skilled in SQL, requirements and data analysis, Agile methodologies, and the software development life cycle. Known for her passion, diligence, curiosity, and relentless focus on delivering best-fit software solutions, Mary focuses on aligning product strategy with operational realities and regulatory demands facing multiemployer pension funds.
