Ira Goldstein

Global Cybersecurity Leader and Advisor
Kernel Advisory
Toronto, Ontario

Ira Goldstein is an entrepreneur and cybersecurity expert who advises on business growth, risk and cybersecurity to public and private sector leaders in his role as CEO of Kernel Advisory. Goldstein's career has taken him from leading complex security programs to executing dozens of mergers and acquisitions as well as hundreds of technical projects across a wide range of sectors with companies around the world. He previously served as the chief operating officer of Herjavec Group, a company which he helped build over more than a decade into a global cybersecurity provider, later acquired by Apax Partners. Goldstein is a published thought leader specializing in emerging business trends in security, privacy and identity. He is an active member on corporate boards, including as: the executive chairman of UltraViolet Cyber; board director for Flare, a digital footprint security software; and board director at Carbide, a security and compliance automation platform. Goldstein also serves in a volunteer capacity as a board director of the Rogers Cybersecure Catalyst at Toronto Metropolitan University as well as a board director for United for Literacy, Canada's largest literacy organization.
