Mr. Angen is a principal on the responsible investing team at the Ontario Teachers’ Pension Plan (OTPP). He provides subject matter expertise on climate change and energy transition. Mr. Angen supports the integration of climate change risk and opportunity considerations throughout the investment lifecycle, leads portfolio carbon footprinting and total fund climate change risk measurement work, and supports the internal climate change working group. Prior to joining OTPP, he was the Ontario regional director at the Pembina Institute, where he was responsible for both the Ontario and federal programs. Mr. Angen’s work at the institute included convening thought leaders, technical analysis, policy advocacy, fundraising and team management. His background includes project engineering and project management with the Alberta oil and gas sector, as well as extensive experience working in international development. Mr. Angen holds a bachelor of science degree in chemical engineering from the University of Calgary.
