

**Sarah M. Lee, Ph.D.**

**Lead Health Scientist  
Centers for Disease Control and Prevention,  
Division of Population Health, Healthy Schools Branch  
Atlanta, Georgia**

Sarah M. Lee is team lead for the Research Application and Evaluation Team with the School Health Branch, Division of Population Health at the Centers for Disease Control (CDC). Her team focuses on chronic disease prevention and management in schools, providing scientific expertise and leadership on pertinent documents, surveillance systems and CDC school health programs. Lee served in numerous deployments to the CDC's COVID-19 response as the team lead for the Community Guidance Team and the Deputy for the Community Interventions and Critical Populations Task Force. She has been at the CDC for 17 years, all of which have been dedicated to improving school and student health. Lee has authored over 40 manuscripts, reports, book chapters and commentaries. She earned her master's degree in science in community health promotion from the University of Montana and her Ph.D. degree in exercise and wellness education from Arizona State University.
