

**Sarah Matousek, Ph.D., M.P.H.**

**Principal  
Day Health Strategies  
Somerville, Massachusetts**

Ms. Matousek is a principal for Day Health Strategies, brings more than 12 years of health care and research experience to her client work, and is currently immersed in payment reform. Her expertise includes health reform, data and analytics, quantitative and qualitative research, operations, program development, change management, and strategic planning/implementation. Some examples of Ms. Matousek's client work include Accountable Care Organization (ACO) planning and implementation, clinical care delivery redesign, payer and provider leadership development, analytic program design, dashboarding, and primary care/behavioral health integration efforts. She holds an adjunct faculty position at Boston University Metropolitan College, and she is an affiliate member of Ariadne Labs at the Harvard T.H. Chan School of Public Health. In addition, Ms. Matousek co-leads ongoing global health research with a Boston-based team working remotely on a surgical navigation and outcomes program in rural Haiti. She holds a Ph.D. degree in neurobiology and anatomy from the University of Rochester and a M.P.H. degree in health policy and management from Boston University.
